

Endodontic Record

Faculty of Dentistry, Chiang Mai University

Patient's name: koy **Age:** 23 **Gender:** F

Patient's History

Medical History

☐ None ☐ Cardiovascular Diseases ☒ Pulmonary Diseases ☐ Gastrointestinal Diseases
☒ Hematologic Diseases ☐ Neurologic Diseases ☒ Allergic to : eeeee ☒ Blood Pressure : 130/50
☐ Other : ☐ Taking medicine : Personal Doctor : prapassornsiri Tel : 0899499969

Remark :

Dental History

Chief Complaint : ppppppppp

History of Present Illness :

Examination

S.Subjective Symptoms

Pain intensity: none

Pain Character: sharp

Onset: ☒ Spontaneous
☒ Stimulation Required (biting)

Duration: minutes

Location: localized ☒ Radiating to : 42 ☒ Referred to : 43

O.Objective Symptoms

Extraoral: ☐ Facial Swelling ☒ Lymph Node ☐ Sinus Tract Other:

Intraoral: Sweling (Soft) area : 43 ☒ Sinus Tract at : 42

Tooth: ☒ Caries ☒ Restoration with : 44 ☒ Pulp Exposure ☐ Pulp Polyp
☒ Fracture at : 43 ☒ Crown Discoloration to: 43
☐ Opened for Drainage ☒ Temp. Restoration Other :

Examination:

Tooth	EPT	Cold	Heat	Perc ⁿ	Palp ⁿ	Mobility	Pero Probe (mm)						Special Test (if necessary)
							MB	B	DB	ML	L	DL	
42	30	WNL	+	+	WNL	2 ⁰	1.3	2.1	1.5	2.3	1.1	1.5	illumination test

Radiographic findings

Crown: ☐ Normal ☒ Caries area : 44 depth : 2 ☒ Restoration ☐ Fracture / Other :

Pulp Chamber: ☐ Normal ☒ Calcification : Partial ☒ Pulp Stone ☐ Resorption / Other :

Root: ☐ Normal ☒ Caries ☒ Curvature ☒ Ext. Resorption ☐ Fracture / Other :

Pulp Canal: ☐ Normal ☒ Calcification: Complete ☒ Resorption ☐ Perforation ☐ Previous RCT ☒ Broken Instrument
Other :

Periradicular: ☐ Normal ☒ Widening PDL ☐ Loss of Lamina Dura ☐ Periapical Lesion : ☐ Lateral Lesion : ☒ Resorption
☐ Open Apex ☐ Osteosclerosis ☒ Hyperplasia of cementum / Other :

Alveolar Bone: ☐ Normal ☒ Generalized Bone loss ☐ Localized Bone loss / Other :

Remarks: ppppppppp

Diagnosis

Pulpal Diagnosis

- ☐ Normal
- ☐ Reversible Pulpitis
- ☒ Irreversible Pulpitis
 - ☒ Symptomatic
 - ☐ Asymptomatic
- ☒ Pulp Necrosis
- ☐ Previously Initiated Therapy
- ☒ Previously treated: Improper

Periradicular Diagnosis

- ☐ Normal
- ☐ Symptomatic Apical Periodontitis
- ☒ Asymptomatic Apical Periodontitis
- ☒ Acute Apical Abscess
- ☐ Chronic Apical Abscess
- Other :

Treatment Planning

- ☐ No Treatment
- ☒ Pulpotomy: Full
- ☒ Pulpectomy
- ☐ Non-surgical Root Canal Treatment
- ☐ Non-surgical Retreatment
- ☒ Apexification
- ☐ Intentional RCT
- ☒ Surgical Root Canal Treatment
- ☐ Perio Consult

Other :

Plan for final restoration: ครอบฟันและใส่เดือยฟัน

Pre-op treatment: ☐ Caries Removal ☒ Dam Other :

Anesthesia: ☒ Required ☐ Not required
